WHEATON introduces the New UniSpense[®] PRO and OmniSpense[®] ELITE Peristaltic Pumps
Intelligent peristaltic pumps are operated by an Icon Driven Interface and the Largest Display Screen available

WHEATON, the company that designs and delivers today's most innovative solutions for the laboratory research, diagnostic packaging and specialty pharmaceuticals industries, is pleased to introduce two new Peristaltic Pumps: the UniSpense[®] PRO and OmniSpense[®] ELITE. These new Peristaltic Pumps have been developed to facilitate precise performance and operation, thus minimizing researchers' time and effort while achieving accurate sample handling.

Designed to be the smartest intuitive dispensing pumps on the market, the UniSpense PRO and OmniSpense ELITE are operated by an icon driven interface that features the largest display screen available. The systems are operated via a large 5" backlit liquid crystal display with a chemical resistant keypad and options are displayed as large icons for quick operation and easy recognition in any language, any geography, and any country. WHEATON's new peristaltic pumps will simplify and accelerate laboratory throughput for dispensing or aspirating multiple aliquots, or even for small filling operations.

Another highlight of the new UniSpense PRO and OmniSpense ELITE pumps are their small footprint and angled polarized display, perfect for use under a fume hood or biological safety cabinet. Calibration of the new pumps is easy: a single intuitive calibration screen walks the user through the process stepwise, thus eliminating time consuming scroll through menus and complicated instruction manuals. Additionally, the OmniSpense ELITE and UniSpense PRO can be outfitted and programmed for specific processes. Once saved, these programs have the ability to be easily recalled, ensuring a quick application turnaround. WHEATON's new OmniSpense ELITE and UniSpense PRO peristaltic pumps are for any laboratory or clinical setting where accurate and precise liquid dispensing is important.

"Throughout our history, we have witnessed the value researchers place in their experiments by the incredible focus and care they put into each and every sample," says Stephen R. Drozdow, president of WHEATON. "With our new pumps, we embody that focus and care with the smartest interface available in a peristaltic pump to date," he added.

About WHEATON

WHEATON admires those people who devote their life to science. It's this admiration that drives us to design and deliver today's most innovative solutions for the laboratory research, diagnostic packaging and specialty pharmaceuticals industries. It's this admiration that motivates us to offer the best customer service experience and most dependable products in the industry. And, it's with admiration that we stand behind those people who help move the world forward one discovery, one sample at a time. The WHEATON name means more than a legacy of the highest quality products and services; it stands for a commitment to honor the effort of all scientists... because it's their life's work.
